AI Deployment & Consultation - Voice Agents & LLM Solutions

Sisak, Croatia • pbozuric@outlook.com • +385 99 284 9205 • bozuric.com • linkedin.com/in/pbozuric • github.com/p3bozuric

PROFILE

I deploy AI solutions for clients and own the relationship that gets them into production. I work between business stakeholders and engineering teams: scoping the real problem, shaping the use case, and explaining the technical side to the people who sign off on it. I deliver voice and chat agents, automate operational workflows, and help teams adopt AI in their daily work. I also build what I propose, so clients see a working prototype on a production stack before they commit.

EXPERIENCE

AI Consultant ASEE Jan 2026 - Present

- Advise clients on applying AI to operational and customer-facing workflows; scope use cases and own delivery from prototype to production.
- Consult on internal AI tooling and AI adoption, helping teams put AI into their day-to-day work.
- Deliver voice agent solutions for clients, from use-case definition to production.
- Turn client business needs into technical requirements the engineering team can build against.

AI Developer ASEE Mar 2025 - Dec 2025

- Integrated ElevenLabs voice AI into existing customer experience (CX) products.
- Prepared and ran product demos for prospective clients, presenting AI capabilities to non-technical audiences.
- Built the product documentation site on Zensical and a pipeline that keeps it up to date.
- Automated internal business processes, such as classification of incoming email.

Founder KodAI Oct 2024 - Present

- Independent AI consultancy. I run custom AI integration and automation projects end to end: scoping, build, client communication, and delivery.

CAPABILITIES

CONSULTING & DELIVERY

AI adoption use-case scoping stakeholder communication
client demos prototype to production change management

TECHNICAL

LLM integration RAG voice agents MCP ElevenLabs
LiveKit LangChain / LangGraph Claude Code Codex
Python FastAPI REST APIs Docker AWS n8n

LANGUAGES

Croatian: native • English: advanced

SELECTED PROJECTS

ClawHarbor in progress

MCP-as-a-service. One crawl of a business website publishes a hosted MCP endpoint and a WebMCP page that AI agents can call. clawharbor.io

AIDRIATIC in progress

Maritime intelligence platform with three streams: Office, Bridge, and Analysis. aidriatic.com

COLREG Assistant

Maritime navigation assistant (RAG) with voice input, streaming answers, and interactive visual aids. colregs.bozuric.com

EDUCATION & CERTIFICATIONS

M.Sc. Nautical Studies & Maritime Transport Technology University of Rijeka 2020 - 2022
Dean's Award for Academic Excellence

B.Sc. Nautical Studies & Maritime Transport Technology University of Rijeka 2017 - 2020

Adding Knowledge to LLMs NVIDIA Professional Certificate 2025
