Profile

I get AI adopted. I work with clients and internal teams to find the use cases worth doing, define them, roll them out and support people until AI is part of their daily work. I integrated ElevenLabs voice agents into a production contact-centre platform and helped clients and teams adopt them. I sit between business stakeholders and engineering, and I can build what I propose, so clients see a working proof of concept before they commit.

Experience

AI Consultant ASEE Solutions · Remote

Jan 2026 - Present

- Identify and define AI use cases with clients; translate business needs into technical requirements for the dev team.
- Advise on bringing AI tools into employees' daily work and support teams through adoption.
- Deliver voice AI agents for clients, from scenario definition and functional spec to production.
- Coordinate and track AI features on the ASEE Live platform: AI agent assist, AI agent integration, knowledge base, call transcription, post-call analytics.
- Built internal AI tools (MCP servers) connecting AI assistants to internal business systems; rolled them out to colleagues and supported them.
- Work with AI vendors on technical evaluation, commercial models and GDPR compliance.
- Evaluate alternatives: open-source voice agent frameworks (Pipecat, LiveKit Agents), speech recognition (Faster Whisper), Croatian TTS (fine-tuning XTTS v2).
- Presales: technical consulting, proposals, presentations and proof-of-concept demos; live demos and talks at conferences.

AI Developer ASEE Solutions · Remote

Mar 2025 - Dec 2025

- Integrated ElevenLabs conversational AI and voice agents into the ASEE Live platform.
- Built LLM and RAG-based solutions.
- Automated internal processes, e.g. automatic classification and routing of incoming email.
- Built a product documentation system on Zensical with a semi-automated content maintenance process.
- Prepared and ran product demos for prospects; presented AI capabilities to non-technical audiences.

Founder KodAI · Remote

Nov 2024 - Present

- Independent AI consulting and implementation for small and medium businesses.
- Run AI integration and automation projects end to end: needs analysis, build, client communication, delivery.
- Advise on applying LLMs and RAG in business; business process automation (n8n, Python, REST API integrations).

Intern AI Center Lipik

Apr 2024 - Sep 2024

- Computer vision models (object detection and classification in images and video), dataset preparation and labelling, LLM/RAG prototypes; Python with PyTorch, Hugging Face and OpenCV.

Capabilities

AI ADOPTION & ENABLEMENT

Use case discovery, business value assessment, rollout and change management, team training and support, functional specs, presales and PoCs, vendor management, GDPR in AI solutions.

LANGUAGES

Croatian: native · English: C1

TECHNICAL

ElevenLabs, LiveKit, Pipecat, MCP, LangChain / LangGraph, RAG, n8n, LLM integration, voice agents, Claude Code, Codex, Python, FastAPI, REST APIs, PyTorch, Hugging Face, Docker, AWS.

Projects

ClawHarbor *in progress*

MCP-as-a-service. One crawl of a business website publishes a hosted MCP endpoint and a WebMCP page that AI agents can call. [clawharbor.io](#)

AIDRIATIC *in progress*

Maritime intelligence platform with three streams: Office, Bridge, and Analysis. [aidriatic.com](#)

COLREG Assistant *live*

Maritime navigation assistant (RAG) with voice input, streaming answers, and interactive visual aids. [colregs.bozuric.com](#)

Education

M.Sc. Nautical Studies & Maritime Transport Technology

University of Rijeka

2020 - 2022

Dean's Award for Academic Excellence

B.Sc. Nautical Studies & Maritime Transport Technology

University of Rijeka

2017 - 2020

Adding Knowledge to LLMs

NVIDIA Professional Certificate

2025

Ongoing self-directed AI training

Ongoing

LLM engineering, agents and MCP, production deployment
